neXt WAYFINDING + DESIGN  
600 West Fulton Street – 8th floor  
Chicago, Illinois 60661

Re: **Letter of Recommendation**

To whom it may concern,

My experience with neXt wayfinding + design was very positive.

I was impressed with your company's expertise and ability to design outstanding wayfinding product meeting all the customer's requirements. Your signage system at Motorola Libertyville truly helped Motorola Libertyville 5,000+ employees' population navigating labyrinths of their complex contemporary buildings with ease and presented very structured and attractive wayfinding design concept.

I personally enjoyed working with you and your associates while implementing new GEOMOTO concept. Your new signage is now well integrated part of the Motorola Mobile Devices Business headquarters interior and complements this campus tremendously.

Sincerely,

**Boris Barats**
